Message from the Guest Editors

Water from the sky, water from the ground: water has always been a fundamental resource of life and cities. For this Special Issue, we are interested in contributions that investigate and reflect the importance of water inside contemporary cities to face climate change through either empirical research or conceptual/theoretical works, examining any key processes. Contributions at the intersection of geography, political ecology, architecture, and urbanism are especially welcome, but contributions from other human–environment fields at the forefront of water and public space in the climate change context are also highly welcome. Regional and scalar diversity in contributions is also desired.

Deadline for manuscript submissions:

30 June 2022

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), AGRICOLA, AGRIS, GeoRef, RePEc, and many other databases.

Journal Rank: [JCR](#) - Q2 (*Environmental Studies*) / [CiteScore](#) - Q2 (*Nature and Landscape Conservation*)
